MUHAMMAD ADIL USMANI

Computer Science Student

ML Engineer | AI Developer

Lahore, Punjab, Pakistan | muhammadaadilusmani@gmail.com | +92 311 4086626
Portfolio | LinkedIn | GitHub

Passionate Computer Science student with 2+ years of hands-on ML/AI experience. Built production-ready systems including a live cricket AI chatbot serving global users. Expertise in Python, TensorFlow, and full-stack deployment with proven track record of 85%+ accuracy in predictive modeling projects.

TECHNICAL SKILLS

Programming

Python, C++, SQL

ML/AI

LangChain, LangGraph, LangSmith, Scikit-learn, Deep Learning, FastAPI, Pandas, NumPy

Tools

Git/GitHub, Docker, Redis, Vercel, Render, GCP, Azure AI, Linux, Cursor, Kilo Code

EDUCATION

Bachelor of Science in Computer Science

University of Central Punjab

Expected May 2026

Intermediate in Pre-Engineering

UGI

2022

CERTIFICATIONS

Supervised ML: Regression & Classification

Stanford/Coursera

Completed

Machine Learning Specialization

DeepLearning.AI

In Progress

LLMOps Specialization

Duke University

In Progress

LANGUAGES

English	Urdu	Punjabi
Fluent	Native	Conversational

TECHNICAL PROJECTS

Cricket AI Assistant (Production API)

FastAPI • Google Gemini AI • Redis • LangChain • Security

Deployed production-ready cricket chatbot with 6 specialized domains and enterprise-grade security. Implemented rate limiting, API authentication, and prompt injection prevention. Live on Render with Redis caching, serving global users.

Customer Churn Prediction System

Python • TensorFlow • Scikit-learn • Machine Learning

Built ML system predicting customer churn with 85% accuracy using logistic regression and neural networks. Developed comprehensive preprocessing pipeline for proactive retention strategies.

NVIDIA Stock Forecasting Model

LSTM • TensorFlow • Financial APIs • Time Series Analysis

Created LSTM neural network achieving 78% directional accuracy for stock price prediction. Integrated real-time financial data feeds with sophisticated time-series preprocessing.

Article Summarization Tool

T5 Transformer • NLP • Web Scraping • REST API

Full-stack web app for automated article summarization using Google's T5 model. Achieved 90% content retention accuracy with robust web scraping pipeline.

EXPERIENCE

Personal Project Developer & Self-Learner

Independent Learning & Development | Jan 2023 - Present

- Developed and deployed 4+ ML applications to production environments
- Built automated systems for data processing, predictive analytics, and NLP applications
- Self-directed learning in AI/ML technologies through hands-on project implementation

KEY ACHIEVEMENTS

- Deployed 4+ machine learning applications to production environments
- Built API serving cricket knowledge with specialized domain expertise
- Achieved 85%+ accuracy across multiple predictive modeling projects
- Successfully integrated enterprise security features in production systems
