# MUHAMMAD ADIL USMANI

Computer Science Student
ML Engineer | AI Developer

Lahore, Punjab, Pakistan
muhammadaadilusmani@gmail.com
+92 311 4086626
Portfolio | LinkedIn | GitHub

## TECHNICAL SKILLS

**Programming:**
Python, C++, SQL

**ML/AI:**
TensorFlow, Scikit-learn, Deep Learning, NLP, FastAPI, Pandas, NumPy

**Tools:**
Git/GitHub, Docker, Redis, Vercel, Render, GCP, Azure AI, Linux

## EDUCATION

**Bachelor of Science in Computer Science**
University of Central Punjab
Expected May 2026

**Intermediate in Pre-Engineering**
UGI | 2022

## CERTIFICATIONS

**Supervised ML: Regression & Classification**
Stanford/Coursera (2023)

**Machine Learning Specialization**
DeepLearning.AI (In Progress)

**LLMOps Specialization**
Duke University (In Progress)

## LANGUAGES

**English:** Fluent
**Urdu:** Native
**Punjabi:** Conversational

## PROFESSIONAL SUMMARY

Passionate Computer Science student with 2+ years of hands-on ML/AI experience. Built production-ready systems including a live cricket AI chatbot serving global users. Expertise in Python, TensorFlow, and full-stack deployment with proven track record of 85%+ accuracy in predictive modeling projects.

## TECHNICAL PROJECTS

### Cricket AI Assistant (Production API)

*FastAPI • Google Gemini AI • Redis • LangChain • Security*

Deployed production-ready cricket chatbot with 6 specialized domains and enterprise-grade security. Implemented rate limiting, API authentication, and prompt injection prevention. Live on Render with Redis caching, serving global users.

### Customer Churn Prediction System

*Python • TensorFlow • Scikit-learn • Machine Learning*

Built ML system predicting customer churn with **85% accuracy** using logistic regression and neural networks. Developed comprehensive preprocessing pipeline for proactive retention strategies.

### NVIDIA Stock Forecasting Model

*LSTM • TensorFlow • Financial APIs • Time Series Analysis*

Created LSTM neural network achieving **78% directional accuracy** for stock price prediction. Integrated real-time financial data feeds with sophisticated time-series preprocessing.

### Article Summarization Tool

*T5 Transformer • NLP • Web Scraping • REST API*

Full-stack web app for automated article summarization using Google's T5 model. Achieved **90% content retention accuracy** with robust web scraping pipeline.

## EXPERIENCE

### Personal Project Developer & Self-Learner

*Independent Learning & Development | Jan 2023 - Present*

• Developed and deployed 4+ ML applications to production environments
• Built automated systems for data processing, predictive analytics, and NLP applications
• Self-directed learning in AI/ML technologies through hands-on project implementation

## KEY ACHIEVEMENTS

- Deployed 4+ machine learning applications to production environments
- Built API serving cricket knowledge with specialized domain expertise
- Achieved 85%+ accuracy across multiple predictive modeling projects
- Successfully integrated enterprise security features in production systems
